

Model no. **BC-D4, BC-T4**

DOUBLE OVERHEAD BRIDGE (AUTO WEB/TENSION CONTROL)

Feature

- Parallel conveyor able to guide single face from Preheater
- Main frame is made of U-bar
- Operation panels at both upper and lower bridges
- Equipped with automatic web and tension control
- Controlled by C.C.D. (Charge Coupled Device) for accuracy of sheet edge alignment within 1 mm
- "Auto function" aligns sheet width automatically in relation to width of sheet, keeping upper and lower single face in center of the machine
- "Manual function" operator can set upper and lower single face to either operating side or driven side and will align sheet automatically.
- Automatic tension control device is equipped with a precise
- A.C. servo motor providing accurate alignment and torque force
- Surface of tension roll wrapped with non-slip belt, torque force control by servo motor that will align tension of single face automatically

Model no. **GU-D4**

DOUBLE GLUE MACHINE

Feature

- Glue roller with netting dents, engraving and plated-chrome treatment
- Doctor roller is well treated by grind and plated-chrome
- Pressure roll controlled by pneumatic system
- Equipped with preheating roller
- Gap control between glue roll/doctor roll, glue roll/pressure roll controlled by electric micro-adjustment and digital indication
