

Model no. **MSF-30P**

# MULTI-CASSETTE POSITIVE PRESSURE SINGLE FACER

## Feature

- New model MSF-30P developed by hands-on concept, proved to present the superior mechanical construction, characteristics and operation control of whole machine
- Lubrication system between corrugating roll/pressure roll adopted anti-high temperature and grease, away from bearings carbonized, extended life of bearings
- Corrugation roll/pressure roll equipped with oil pressure system harmony with accumulator, which has the stability of oil pressure control and cushioning effect of pneumatic control; micro-adjustment of rolls uses oil pressure motor to avoid using A.C. motor's defect
- Design of MSF-30P considered lowering center of gravity, reducing vibration and improving fluted shape of the corrugating roll during grinding for smooth production
