

Model no. **SF-20N**

SINGLE FACER

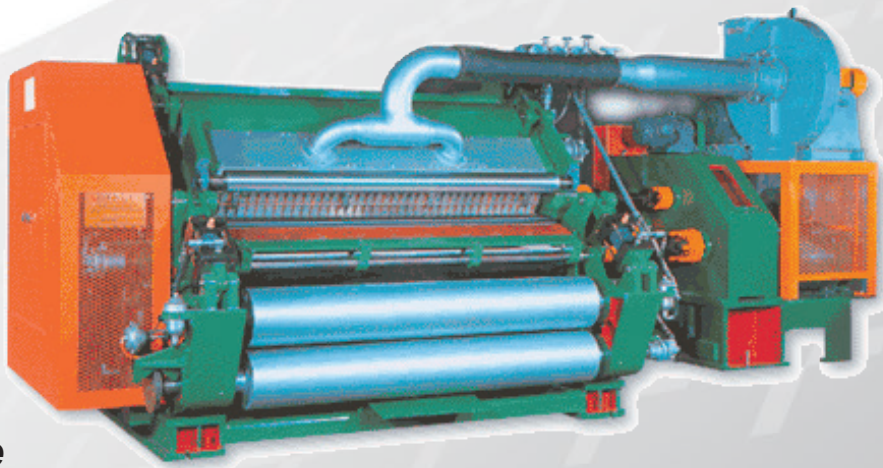

Feature

- Type: Fingerless single facer.
- Upper and lower corrugating rolls are made of Ni-Cr-Mo alloy steel with heated-treatment for hardness SHORE 700 or more and surface is well treated by grind and plated-chrome
- Bearing for upper/lower corrugating roll and pressure roll using high-temperature lubrication to keep running smoothly and durable
- Adjustment for upper corrugating roll, pressure roll and glue roll controlled by pneumatic system.
- Equipped with pre-heater and pre-condition steam shower
- Gap control between lower corrugating roll/pressure roll, lower corrugating roll/glue roll and glue roller/doctor roller are adjusted by electric micro-adjustment and digital indication.
- With motorized glue damper.

Model no. **SF-25NB**

SINGLE FACER

Feature

- Type: Fingerless single facer
- Upper and lower corrugated rolls are made of Ni-Cr-Mo alloy steel with heated-treatment for hardness SHORE 700 or more and surface well treated by plated-chrome
- Bearing for upper/lower corrugated roll and pressure roll using auto lubrication device
- Adjustment for upper corrugating roll, pressure roll and glue roll are controlled by air cylinder (2200 or wider machine controlled by hydraulic system)
- Equipped with pre-heater and pre-condition steam shower
- Gap Control between lower corrugating roll and pressure roll, glue roll and doctor roll are controlled by motorized micro-adjustment with digital indication
- With motorized glue damper.
